

Are you worried about a recent change in your child's condition or that of a child you are caring for?

If yes.... REACH out.

What is REACH about?

R

Recognise

We know you may recognise a worrying change in a child's condition.

E

Engage

1 We encourage you to engage with the nurse looking after your child or the RN in charge to share your concern.

A

Act

2 Ask the RN in Charge for a 'Clinical Review'. This should occur within 30 minutes.

C

Call

3 If still concerned make a REACH notification by talking to the RN in charge about activating a Rapid Response.

H

Help is on its way

The RN in Charge will call 000 for an ambulance.

We encourage you to first speak with your treating nurse who may be able to help you to resolve your concerns.

Allowah's Rapid Response involves transferring patient care to another medical facility.
